## › Why OCCMS?

- › It saves money.
- › Prevents unnecessary man hours.
- › Will deliver your project and sustainable production on time and to budget.

## › How much does it cost?

- › Exactly the same as you plan to spend now and nothing more.

## › How does this work?

- › By using the same number of resources as you would normally use only in a structured organised manner i.e. The OCCMS Approach.

## › Products Available using the OCCMS Approach:

### › Orbit – Completions Management System Software (Database Application)

- › An electronic warehouse for the storage of task Completion data.
- › A means of reporting the Completions status at any point in time of an item, equipment, system, plant and ultimately the entire project.

### › System Governance

- › *Strategies and Philosophies*
- › *Procedures*
- › *Processes*

These 3 control modules are used to organise and manage the execution of Completions and Commissioning on your project. Template based and customized (to your project) they put in place the documents which will control and preside over all of your Completions & Commissioning activities.

### › Managed Assurance

- › *TIMACC*
- › *RIMACC*
- › *INMACC*

3 modules work on the Managed Assurance platform. Designed to put in place Risk, Integrity and Interface control mechanisms in Completions & Commissioning. These modules eliminate surprises at Mechanical Completion, ensure a high level of communication takes place throughout and deliver a reliable facility consistent with design expectations.

### › Premier Community

Personnel are key to the success of any project. Our personnel database contains real-time information on the availability of the most experienced individuals who have ever worked in a Completion and Commissioning role anywhere in the world. We can provide dedicated teams for an OCCMS assignment and/or manpower only.

### › Custom Client

Our service covers everything needed to prepare, manage, control and deliver Completions & Commissioning to a project. Custom Client allows us to adapt a requirement based on client needs, integrate it into the OCCMS system where appropriate and carry out the work to deliver exactly what the Client has asked for.
